TRAPT : Developed An Webpage with the help of Angular js Framework and firebase to reducing food waste[(try here..)](#)

WEATHER FORECAST APP [(github-repo)](#)

ACHIEVEMENTS

- Achieved 5 star at Hackerrank in Programming Languages : CPP and python .
- Achieved 1100+ Rating at codechef which helped in improving my coding skills .
- I actively participated in the 2022 Hacktoberfest event on Github, where I successfully made contributions to various open-source repositories using [Github account](#). This opportunity gave me the chance to enhance my coding skills and expand my professional network.

EXPERIENCE

Web Developer   2022 - Current
GDSC JEC   *JABALPUR,*

- As the lead Frontend developer, I played a key role in driving the website development process, which resulted in a significant improvement in my web design skills.
- As part of a team, I played a key role in the development of the frontend of the GDSC JEC website, utilizing my expertise in HTML, CSS, the Bootstrap framework, and JavaScript to create a visually appealing and user-friendly experience..
